Art Unit: 3662

1. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of independent claims 1, 11, and 19, parts b) and c) of the claim are indefinite and unclear in context particularly as to the phrases "determining the size of a scan strategy" and "determining a capacity of a receiver system used to implement the scan strategy." Is the first phrase a determining of the necessary size the scan strategy for some desired results? Is the second phrase a determining of the necessary capacity of a receiver to carry out the scan strategy?

Claim 18 is indefinite and unclear in that it refers to claim 7 as being claim for a "computer-readable medium," but claim 7 is a method claim.

Dependent claims 2-10, 12-18, and 20 are unclear in that they depend from unclear independent claims 1, 11, and 19.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art herewith is of interest for showing prior art systems and methods of detecting RF emitters.
